

Membership WG - conclusions

Andrzej Bartosiewicz

CENTR GA

25 February 2010

Main conclusions

- CENTR should keep an European focus
- only European ccTLDs can join CENTR as Full Members
- No changes to the existing Membership

Full Members decide

- Due to the fact that Full Memembebrs only can decide on the targets, goals and scope, and only European ccTLDs can join as FMs, there is no danger that the new TLDs will dominate the CENTR's agenda.
- **Regardless of the number** of AM or Observers, the scope and agenda will be defined by (existing) FM.

Voting rights

- **One legal entity = one Membership** no matter how many TLD operates.

Number of GA participants

- It's possible that the number of AMs will increase significantly...
- Internal rules / bylaws should be amended to give to the Board the possibility to:
 - impose the “conference” fee for AM or
 - restrict number of attendees from each AM if necessary.
- This can only apply to the entities that become the AM after specific (future) date.
